(54) LIQUID CRYSTAL DISPLAY, AND DRIVE METHOD FOR THE LIQUID CRYSTAL DISPLAY

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a liquid crystal display which has superior moving-image display quality by preventing 'ghosts' where a display of the previous frame is visible as an after-image.

SOLUTION: In this line sequential type drive method, which displays an image of one frame by writing a signal to all pixels by sequentially selecting respective gate lines, each gate line is selected at least twice, within a period of one frame and an erasure voltage for placing the respective pixels in the same state and a gradation voltage corresponding to an image to be displayed are each written once, to each pixel connected to a gate line.
